

Acceptable Combinations of Diabetes Medications (Updated 02/27/19)

Use: no more than one medication from each group (A-E) below. Up to 3 medications total are considered acceptable for routine treatment according to generally accepted standards of care for diabetes (American Diabetes Association; American Association of Clinical Endocrinologists). For applicants receiving complex care (e.g., 4-drug therapy), refer the case to AMCD.

- Initial certification of all applicants with diabetes melitus (DM) requires FAA decision
- For applicants on AASI for DM, follow the [AASI](#)
- Consult with FAA for any medications not on this chart
- Fixed-dose combination medications **count as 2 medications**

Note: Amylinomimetics (e.g., pramlintide (Symlin)) are not considered acceptable for medical certification.
